Safety Recall 02S39

Mr. John Sample
123 Main Street
Anywhere, USA 12345

Your Vehicle Identification Number: 12345678901234567

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Ford Motor Company has decided that a defect that relates to motor vehicle safety exists in certain 2002 Crown Victoria Natural Gas Vehicles (NGV).

We apologize for this situation and want to assure you that, with your assistance, we will correct this condition. Our commitment, together with Ford and Lincoln Mercury dealers, is to provide you with the highest level of service and support possible.

What the issue is …

On some of the affected vehicles, a "T" fitting that connects fuel tanks three and four may develop a leak when solenoid valves are energized, such as when the ignition switch is in the ON position or during refueling. The leak can be easily heard and will stop leaking when the ignition key is turned to the OFF position or the refueling process is terminated. A gas leak of sufficient quantity concentrated in an area to create a combustible mixture and in the presence of an ignition source could result in a fire.

What Ford Motor Company and your dealer will do ...

At no charge to you, your Ford Certified NGV dealer will repair your vehicle free of charge (parts and labor). Your dealer will install a redesigned "T" fitting on number four fuel tank. The fitting will also be tested for leakage.

How long will it take?

The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.
