November 2000

TO: All Ford and Lincoln Mercury Dealers

SUBJECT: Special Field Action 00L05 : Certain 1997 through 2000 Model Year Econoline Vehicles with 5.4L and 6.8L Engines and 50-State Certifications – Replacement of Emission Control Information Labels

OASIS : Yes
OWNER LIST: Yes
PARTS RETURN: No
PROGRAM TERMS: Not Applicable

AFFECTED VEHICLES

Certain 1997 through 2000 model year Econoline vehicles equipped with 5.4L and 6.8L engines with 50-State certification and built at the Lorain Assembly Plant through September 16, 1999.

REASON FOR THIS PROGRAM

The affected vehicles were built with emission control information labels installed which are intended for U.S. Federal (49-States) certified vehicles; however the vehicles affected by this program are actually certified for all 50-States. The affected labels should be replaced to correctly represent the emission certification of the vehicles. If the labels are not replaced, the affected vehicle owners may experience difficulty, or be required to pay an environmental fee, if they want to register the vehicle in the State of California.

SERVICE ACTION

This service action requires the replacement of two (2) Emission Control Labels. Due to the difficulty in installing the engine label customers are being asked to bring the vehicle to the dealership for the label installation. Customers have been advised to contact the dealership with their VIN, so labels may be ordered and a service appointment established.

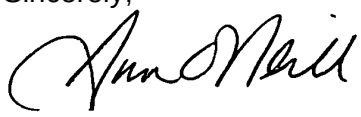

ATTACHMENTS

Attachment I: Administrative Information
Attachment II: Labor Allowances and Parts Ordering Information
Attachment III: Technical Information
Owner Notification Letter

QUESTIONS?

Dear Mr. John Sample:

It has come to our attention that certain 1997 through 2000 Econoline vehicles equipped with 5.4L and 6.8L engines with 50-state certification have incorrect Emission Control Information Labels installed.

We apologize for this situation and want to assure you that with your assistance we will correct this condition. Our commitment, together with Ford and Lincoln Mercury dealers, is to provide you with the highest level of service and support possible.

What the issue is…	Certain 1997 through 2000 Econoline vehicles equipped with 5.4L and 6.8L engines with 50-state certification have U.S. Federal Emission Control Information Labels installed, which do not indicate that the vehicle is also certified for sale in California. These labels must be replaced with labels that correctly reflect the vehicle's emission certification. Failure to replace the labels may result in difficulty, or the need to pay an environmental fee, if you want to register your vehicle in the State of California.
What *Ford Motor Company* and your dealer will do…	Ford Motor Company will at no cost (parts and labor) replace the Emission Control Information Labels on your vehicle.
What we are asking you to do…	Contact your dealer right away. You will need to provide the dealer with the Vehicle Identification Number (VIN) which is listed at the top of this letter. The dealership will order the correct Emission Control Labels for your vehicle. The dealership will contact you when the labels arrive (approximately one week) and schedule an appointment to install the new labels. The time required to perform the label replacement will depend on your dealer's schedule.
If you've changed address or sold the vehicle…	Please fill out the enclosed prepaid postcard and mail it to us if you have changed address or sold the vehicle.

If you have concerns…

If you have trouble getting your vehicle repaired promptly without charge, please contact the Ford Motor Company North American Customer Relationship Center and one of our representatives will be happy to assist you:
