Emissions Recall 02E20

Mrs. Happy Ford Owner
123 Main Street
Detroit, MI 12345-6789

Your Vehicle Identification Number: 012345678901234567

Your satisfaction. Your world. Our priority.
At Ford Motor Company, customer satisfaction comes first. That's why we're committed to building dependable vehicles and maintaining a quality environment.

Upgrade to a cleaner, healthier environment.
It has come to our attention that the Powertrain Control Module (PCM) in your vehicle may contain software that does not comply with California on-board diagnostics regulations. As a result, your vehicle could, in certain circumstances, release air pollutants which exceed California standards. Your dealer will need to perform a simple inspection and software upgrade. This upgrade will ensure that required diagnostic trouble codes and the "Check Engine" light will activate if the air/fuel mixture for your engine were to exceed emissions standards.

This issue does not affect the safety, handling or performance of your vehicle in any way. Please keep in mind that there should be no effect on vehicle operation after upgrading your vehicle's PCM software.

Your Ford Dealer will fix it at no cost.
Please contact your dealer to set up a service date for Emissions Recall 02E20. Have this letter with you when you call, as your dealer will ask for your Vehicle Identification Number (printed at the top of this letter).

Owners of vehicles registered in the State of California must have emissions recall repairs completed prior to vehicle registration renewal. When your dealer completes this emissions repair, you will receive a Vehicle Emission Recall Proof of Correction certificate. You should take the certificate with you when you renew your vehicle registration, but it should be given to the Department of Motor Vehicles (DMV) only if it is requested by the DMV. Otherwise, the certificate is to be held by you for your records.

This inspection and software upgrade should take less than one-half day. However, your dealer may need to keep your vehicle for a longer period of time due to scheduling requirements.

If you do not have this service performed …
Without this service, your emissions warranty may be reduced, your vehicle may not pass emissions or smog tests that may be required in your area and the DMV may not renew your vehicle registration. To ensure your full protection under emissions warranty provisions and to avoid any inconvenience when renewing your registration, it is recommended that you have your vehicle serviced as soon as possible. Failure to do so could be classified as a lack of proper maintenance of your vehicle.

If you have a new address or sold the vehicle …
If you have moved or no longer own this Ford vehicle, please complete and mail the enclosed prepaid postcard so we can update our records and notify the new owner (if applicable) about this emissions recall.

Any questions?
If you have trouble getting your vehicle repaired promptly and without charge, please contact your dealership's Service Manager for assistance. If you still have concerns, please contact the Ford Motor Company Customer Relationship Center and one of our representatives will be happy to help. Be sure to note your vehicle identification number listed at the beginning of this letter.
