TO: All Ford and Lincoln Mercury Dealers

SUBJECT: DEMONSTRATION / DELIVERY HOLD: Safety Recall 02S37:
Certain 2002 Model Year Focus SVT Vehicles
Throttle Body Performance

AFFECTED VEHICLES

Certain 2002 model year Focus SVT vehicles equipped with manual transaxles, built at the Hermosillo Assembly Plant from November 6, 2001 through April 8, 2002.

SAFETY CONCERN

In some of the affected vehicles, there is the potential for the speed control cable to hang up at the throttle body bracket during high, wide open throttle operation, preventing the throttle from returning to the closed position when the accelerator is released. If this condition were to occur, it may be necessary to depress the clutch and apply the brake to bring the vehicle to a stop.

SERVICE ACTION

PLEASE NOTE: PARTS ARE NOT AVAILABLE AT THIS TIME TO REPAIR THE CONDITION STATED ABOVE.

Before demonstrating or delivering any of the vehicles involved in this recall, you are required to disable the speed control cable from all the affected vehicles.

You will be notified in a follow-up communication (tentatively the week of April 22, 2002), when the revised throttle bodies are available.

Please contact any customers who have already taken delivery of any of the affected vehicles involved in this program. Explain to the customer that they have the option of either having their speed control disabled until parts arrive to repair the concern, or be supplied with a rental vehicle until the repairs can be performed.

PLEASE NOTE

Correct all vehicles in stock before delivery. Federal law requires dealers to complete any outstanding safety recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to $5,000 per vehicle.
