BRAKES—EXCESSIVE BRAKE DUST—INFORMATION AND CLEANING TIPS	Article No. 02-11-2

FORD: 1999-2002 ESCORT
1999-2003 CROWN VICTORIA
2000-2002 FOCUS
2001-2002 ESCAPE

MERCURY: 1999-2003 GRAND MARQUIS

ISSUE

Under normal operating conditions, customers may notice accumulation of brake dust on their wheels. Some brake dust is inevitable as brakes wear and does not contribute to brake noise. The use of modern friction materials with emphasis on improved performance and environmental considerations can lead to more dust than in the past.

ACTION

Brake dust can be cleaned by weekly washing with Motorcraft Detail Wash (ZC-3-A) and a soft sponge. Heavier deposits can be removed with Motorcraft Wheel and Tire Cleaner (ZC-37-A).

PART NUMBER	PART NAME
ZC-3-A	Motorcraft Detail Wash
ZC-37-A	Motorcraft Wheel and Tire Cleaner
