## AFFECTED VEHICLES

Certain 2001 model year F150 4x2 vehicles (**Approximately 700** in the U.S. and 2700 in Mexico), built at the Cuautitlan Assembly Plant from December 13, 2000 through February 20, 2001.

## SAFETY CONCERN

In some of the affected vehicles the left front brake hose was damaged during final assembly. A damaged front brake hose may leak resulting in reduced braking and increased stopping distances.

## SERVICE ACTION

Before demonstrating or delivering any of the vehicles involved in this recall, the dealer must replace the hose assembly. This must be done on all of the affected vehicles.

## LOW VOLUME RECALL

This recall is being processed as a Low Volume Recall. This type of field action was announced in an All-Dealer letter dated May 10, 1999. (See Attachment IV)

Owners will be contacting the Low Volume Recall Coordination Center to arrange for this service. We will advise you via MORS III of the owners that chose your dealership to perform the service provided by this Recall program. The parts will be ordered for you by the Program Coordination Center.

You are requested to contact the owner and arrange for this service. (Note that our Coordination Center will advise owners that they will hear from you within the next two business days.)

## PLEASE NOTE

**Correct all vehicles in stock before delivery. Federal law requires dealers to complete any outstanding safety recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to $5,000 per vehicle.**
