DRIVEABILITY—BI-FUEL VEHICLE COMMUNICATION LINK (VCL) AND ALTERNATIVE FUEL CONTROL MODULE (AFCM) TERMINOLOGY CLARIFICATION—BI-FUEL VEHICLES ONLY	Article No. 01-7-4

FORD: 2000-2001 CONTOUR
1996-1997 F-150, F-250 LD
1998-1999 ECONOLINE
2000-2001 SUPER DUTY F SERIES

ISSUE

This article is being published to clarify the use of Vehicle Communication Link (VCL) and Alternative Fuel Control Module (AFCM) terminology for the listed bi-fuel vehicles.

ACTION

Use the text in this article to clarify components, applications, and location of the VCL and the AFCM. The VCL is a separate component and the AFCM is internal to the compuvalve. Refer to the following Service Information for details.

SERVICE INFORMATION

NOTE
FOR MODEL YEAR 2000 AND NEWER BI-FUEL VEHICLES, THE VCL WAS MODIFIED AND REMOVED AS A SEPARATE COMPONENT AND INCORPORATED INTO THE COMPUVALVE (WITH THE EXCEPTION OF THE 2000 CONTOUR).

NOTE
THE NEW GENERATION STAR (NGS) TESTER WILL ALWAYS REFER TO THE VCL AS THE AFCM, WHETHER IT IS A SEPARATE COMPONENT OR INTERNAL TO THE COMPUVALVE.

1. The following application is where the VCL is a separate component.
   - 1996 CNG bi-fuel Econoline and F-Series
   - 1998/1999 CNG/LPG bi-fuel Econoline and F-Series

   The VCL is located inside the passenger side kick panel.

   - 1996 through 2000 CNG bi-fuel Contour

   The VCL is located under the center section of the dash. Refer to Figure 1.

2. The following application is where the AFCM is internal to the compuvalve.
   - 2000/2001 CNG/LPG bi-fuel F-Series Light Duty
   - 2000/2001 LPG bi-fuel F-Series Super Duty

   The AFCM/COMPUVALVE is located underhood. Refer to Figure 2.
